

Spain - land of sun, flamenco, bullfighting, sangria, and paella. True, but also a land with deep roots in pagan mystery religions, **superstition**, Islam, a fascination with **death**, and Roman Catholicism with its

worship of Mary, often identified with the Queen of Heaven. And where **social change** is now headlong into the relaxation of political, spiritual, and ethical structures that hold society together.

Yet this is where **Paul** once journeyed on his way to Tarshish, bringing the good news of Christ - along the very **coast** where we are!

This is where he planted churches around AD63. Now, almost 2000 years later it is to us that God has placed the **responsibility** to spread that very same gospel. And to **minister** to the lonely, the disillusioned, the elderly, the homeless, those trapped by drugs, and to immigrants exploited by unscrupulous employers.

In the past ten years God has **blessed** the Fellowship of The King. Now we **believe** He has great plans not just for this part of Spain but for the whole nation. The fields are 'white for **harvest**' but the workers are few. **Will you stand with us?**

Would you
pray with us
for the harvest?

Can you come
and **help** haul
in the nets?

Will you
SOW
into the work financially?
